

Storage Room Access Information

Your deeded storage unit is available 24/7 for storing household furniture and odds and ends that you prefer not to keep in your unit.

When loading the storage unit, a few rules apply:

1. Do not stack anything higher than the rim of the cage itself, so as to avoid interfering with the fire sprinkler system.
2. Do not store any exposed materials that attract moths, such as blankets, woolens, and other textiles. If you need to store such items, make sure to put them in an airtight container.
3. Do not store flammable materials, such as cleaning products, turpentine, solvents, or open alcohol products. You may store paint cans if the lid is on tight.
4. You are responsible for purchasing and installing your own storage unit lock. A standard “gym” lock or combination lock should suffice.
